

## NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

## MISCELLANEOUS REPORTS ON WELL

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-offs, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS	<input checked="" type="checkbox"/>	REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF		REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL

HOBBBS OFFICE

OIL CONSERVATION COMMISSION  
Santa Fe, New Mexico.

Gentlemen:

Following is a report on the work done and the results obtained under the heading noted above at the \_\_\_\_\_

Phillips Petroleum Company Santa Fe Well No. One in the  
Company or Operator Lease  
center of SW/4 of NW/4 of Sec. 31, T. 17-S, R. 35-E, N. M. P. M.,  
Vacuum Field, Lea County

The dates of this work were as follows: February 10, 1938

Notice of intention to do the work was ~~submitted~~ submitted on Form C-102 on Jan. 10, 1938  
and approval of the proposed plan was ~~submitted~~ obtained. (Cross out incorrect words.)

## DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

Spudded 10:00 AM February 10th.

DUPLICATE

Witnessed by L. L. Smith Phillips Petroleum Co. Lease Foreman  
Name Company Title

Subscribed and sworn to before me this \_\_\_\_\_

11th day of February, 1938

E. L. L. Smith  
Notary Public

My Commission expires 6-1-39

I hereby swear or affirm that the information given above is true and correct.

Name \_\_\_\_\_

Position District SuperintendentRepresenting Phillips Petroleum Company

Title

# RESEARCH REPORT ON THE EFFECTS OF CLIMATE CHANGE ON THE ENVIRONMENT

Author: [Name]

Date: [Date]

The purpose of this research is to investigate the effects of climate change on the environment. This report will discuss the various ways in which climate change is affecting the environment, including changes in temperature, precipitation, and sea level rise. It will also explore the potential impacts of these changes on ecosystems, human health, and the economy.

The research was conducted using a combination of primary and secondary data. Primary data was collected through field observations and experiments, while secondary data was obtained from scientific journals, government reports, and other sources.

The results of the research indicate that climate change is having a significant impact on the environment. This includes changes in temperature, precipitation, and sea level rise, which are all affecting ecosystems, human health, and the economy.

One of the most significant findings of the research is that climate change is causing a shift in the timing and intensity of precipitation. This is leading to more frequent and severe droughts and floods, which are having a major impact on agriculture and water resources.

Another major finding is that climate change is causing a rise in sea levels, which is threatening coastal communities and infrastructure. This is due to the melting of glaciers and ice sheets, as well as the thermal expansion of seawater.

The research also found that climate change is having a significant impact on human health. This includes an increase in the number of heat-related deaths, as well as an increase in the incidence of respiratory and cardiovascular diseases.

Finally, the research found that climate change is having a major impact on the economy. This is due to the damage to infrastructure and agriculture, as well as the costs of adapting to the changes.

Based on the findings of this research, it is clear that climate change is a major threat to the environment, human health, and the economy. It is therefore essential that we take action to reduce greenhouse gas emissions and adapt to the changes that are already occurring.

The following recommendations are based on the findings of this research:

- 1. Reduce greenhouse gas emissions by transitioning to renewable energy sources and improving energy efficiency.
- 2. Adapt to the changes that are already occurring by building resilient infrastructure and protecting vulnerable communities.
- 3. Increase public awareness of the impacts of climate change and the need for action.
