DEPARTMENT OF CHEMISTRY

For the purpose of this experiment, a solution of the substance in question was prepared by dissolving a known weight of the substance in a known volume of solvent. The solution was then subjected to a series of tests in order to determine its properties. The results of these tests are given in the table below.

Test	Result
1. Color	Colorless
2. Odor	None
3. Solubility	Insoluble in water, soluble in organic solvents
4. Melting point	100°C
5. Boiling point	150°C

The above results indicate that the substance is a colorless, odorless solid which is insoluble in water but soluble in organic solvents. Its melting point is 100°C and its boiling point is 150°C. These properties are characteristic of many organic compounds, and further tests will be required to identify the substance.

The following table gives the results of the tests performed on the substance. The tests were performed in the following order: 1. Color, 2. Odor, 3. Solubility, 4. Melting point, 5. Boiling point.

Test	Result
1. Color	Colorless
2. Odor	None
3. Solubility	Insoluble in water, soluble in organic solvents
