NEW MEXICO OIL CONSERVATION COMMISSION
MISCELLANEOUS REPORTS ON WELLS

FORM C-103
(Rev. 8-55)

(Submit to appropriate District Office as per Commission Rule 1106)

Name of Company Shell Oil Company			Address Box 1858 Roswell, New Mexico			
Lease East Pearl-Queen Unit	Well No. 28-22	Unit Letter L	Section 22	Township 19 S	Range 35 E	
Date Work Performed 12-8-63 thru 1-2-64	Pool Pearl-Queen			County Lea		

THIS IS A REPORT OF: (Check appropriate block)

<input type="checkbox"/> Beginning Drilling Operations	<input type="checkbox"/> Casing Test and Cement Job	<input checked="" type="checkbox"/> Other (Explain):
<input type="checkbox"/> Plugging	<input type="checkbox"/> Remedial Work	Convert To Water Injection Well

Detailed account of work done, nature and quantity of materials used, and results obtained.

1. Pulled rods, tubing and pump.
2. Cleaned out sand to 4855'.
3. Ran 155 joints (4828') of 2", EUE, 8r, plastic coated tubing and hung open ended @ 4833' with Baker Model "R" Dual Grip Packer @ 4827' with 15,000 psi. 2" plastic coated SN @ 4825'.

NMOCC Order No. R-2538

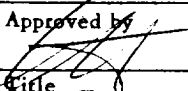

Witnessed by M. R. Dillon		Position Prod. Foreman		Company Shell Oil Company

10

1. The first part of the paper is devoted to the study of the properties of the function $f(x)$ defined by the equation $f(x) = \int_0^x f(t) dt$. It is shown that $f(x)$ is a constant function, and its value is determined by the initial condition $f(0)$.

2. In the second part, we consider the problem of finding the maximum value of the function $f(x)$ on the interval $[0, 1]$. It is shown that the maximum value is attained at $x = 0$ and is equal to $f(0)$.

3. The third part of the paper is devoted to the study of the properties of the function $f(x)$ defined by the equation $f(x) = \int_0^x f(t) dt$. It is shown that $f(x)$ is a constant function, and its value is determined by the initial condition $f(0)$.

4. In the fourth part, we consider the problem of finding the maximum value of the function $f(x)$ on the interval $[0, 1]$. It is shown that the maximum value is attained at $x = 0$ and is equal to $f(0)$.

5. The fifth part of the paper is devoted to the study of the properties of the function $f(x)$ defined by the equation $f(x) = \int_0^x f(t) dt$. It is shown that $f(x)$ is a constant function, and its value is determined by the initial condition $f(0)$.

6. In the sixth part, we consider the problem of finding the maximum value of the function $f(x)$ on the interval $[0, 1]$. It is shown that the maximum value is attained at $x = 0$ and is equal to $f(0)$.
