Re: Division Order R-9431
Greenhill Lovington San Andres Unit

Gentlemen:

According to the provisions of Division Order R-9431, authorizing the expansion of the Greenhill Petroleum Corporation Lovington San Andres Unit, the following wells are to be re-cemented in order to bring the cement above the injection (San Andres) interval:

State L "A"	8-A,	1-17-36
"	9-B,	"
"	10-H,	"
"	11-G,	"
"	12-K,	"

Our records indicate that 125 SX additional cement was squeezed into a casing leak in Well No. 9 in 1976. The top of the cement was not confirmed at that time. You have the option of re-cementing this well or confirming the top of cement with a cement bond log.

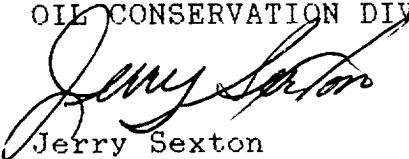

Please submit your proposal for the procedures on the other wells listed above.

If you have information that will exempt any of these wells from further cementing requirements, we will evaluate it and make a determination on an individual basis.

We request 24 hours prior to any workovers in order to witness the operation.

Very truly yours

OIL CONSERVATION DIVISION
