17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

Production from this well had declined to 1 bbl. oil and 49 bbls. water per day and is considered to be depleted in the San Andres, the principal producing zone of the Lovington San Andres Unit. It was shut down on February 27, 1972, and we propose temporarily abandoning it by leaving it shut down and testing at a later date for additional response in other stringers that have not responded to water injection.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
