At 4:40 PM, December 24, 1941 72 hours had elapsed since setting 8-5/8" OD casing at 2056' and cementing with 600 sacks cement on above location. At that time, casing was tested in the following manner:

1000# pressure built up and held for 30 minutes. Test was okay so plug was drilled. 1000# pressure built up again and held for 30 minutes. This test was okay, too, and drilled was resumed.
