Re: Crosby 1 E
Sec. 4-17-36
West Lovington Pool

Gentlemen:

During the casing leak survey of the Lovington field in June 1957 Mr. E. Engbrecht of the Hobbs OCC office found the following condition existed at subject well:

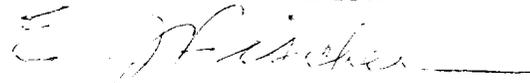

<u>ANNULUS</u>	<u>PRESSURE, psig.</u>
10 3/4" x 7 5/8"	52
7 5/8" x 5 1/2"	59
5 1/2" x 2"	60
2"	60

On venting the 5 1/2" x 7 5/8" annulus to zero gauge pressure the 7 5/8" x 10 3/4" decreased to zero during the same time interval. On closing in both annuli the pressures built up and equalized in ten minutes. The OCC therefore, must assume that a leak exists in the 7 5/8" casing.

You are hereby directed to contact the Commission office in Hobbs to outline a program (C-102) for further testing or remedial work to correct this situation.

Yours very truly,

OIL CONSERVATION COMMISSION

OIL CONSERVATION COMMISSION

HOBBS NEW MEXICO

July 11, 1937

Humble Oil & Mining Co.
Box 2347
Hobbs, New Mexico

Gentlemen:

Enclosed are two copies of a report on the oil well in the Hobbs field, New Mexico, which was drilled by the Hobbs Oil & Mining Co. in 1936. The well was drilled to a depth of 1,000 feet and was found to be productive of oil.

Very truly yours,
[Signature]

The report on the oil well in the Hobbs field, New Mexico, which was drilled by the Hobbs Oil & Mining Co. in 1936, is enclosed for your information. The well was drilled to a depth of 1,000 feet and was found to be productive of oil.

Very truly yours,
