

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

NOTICE OF INTENTION TO DRILL

Notice must be given to the Oil Conservation Commission or its proper agent and approval obtained before drilling begins. If changes in the proposed plan are considered advisable a copy of this notice showing such changes will be returned to the sender. Submit this notice in triplicate. One copy will be returned following approval. See additional instruction in Rules and Regulations of the Commission.

Hobbs, New Mexico

July 6, 1944

Place

Date

OIL CONSERVATION COMMISSION.
Santa Fe, New Mexico.

Gentlemen:

You are hereby notified that it is our intention to commence the drilling of a well to be known as _____

Stanolind Oil and Gas Company - State "E" T-20 Well No. 11 in SW/4 of SE/4

Company or Operator

Lease

of Sec. 4, T 17S, R 36E, N. M. P. M., South Lovington field, Lea County

N.

The well is 660 feet (N.) (S) of the South line and 1980 feet

(E.) (W.) of the East line of Sec. 4 T-17S, R-36E

(Give location from section or other legal subdivision lines. Cross out wrong directions)

If state land the oil and gas lease is No. 13788. Assignment No. _____

If patented land the owner is _____

Address _____

If government land the permittee is _____

Address _____

The lessee is _____

Address _____

We propose to drill well with drilling equipment as follows: Rotary tools to

total depth of 5200'

The status of a bond for this well in conformance with Rule 39 of the General Rules and Regulations of the Commission is as follows: On file with Commission

We propose to use the following strings of casing and to land or cement them as indicated:

Size of Hole	Size of Casing	Weight Per Foot	New or Second Hand	Depth	Landed or Cemented	Sacks Cement
17"	13" OD	IN 50#	Second Hand	250'	Cemented	200
11"	8 5/8" OD	SS 32#	New	2050'	"	600
7 7/8"	5 1/2" OD	SS 14#	New	4800'	"	400

If changes in the above plan become advisable we will notify you before cementing or landing casing. We estimate that the first productive oil and gas sand should occur at a depth of about 4800 feet.

Additional information: Well to be drilled with rotary tools to an approximate total depth of 5200' and the casing program followed as outlined above. All work in connection with drilling and completion to conform to the rules and regulations of the New Mexico Oil Conservation Commission. This well is a compensating offset to the Fred Turner State "B" Well No. 1.

Approved JUL 7 1944, 19____

except as follows:

Sincerely yours,

Stanolind Oil and Gas Company

Company or Operator

By Ralph L. Hendrickson

Position Field Superintendent

OF OPC-WBS.

Figure 1. The effect of the concentration of the solution on the rate of the reaction.

Journal of Interpersonal Violence 26(10) 1978-1997

It is not clear whether the observed differences in the response of the two groups are due to differences in the underlying pathophysiology or to differences in the response to the treatment. The results of this study suggest that the response to the treatment is different in the two groups, but the underlying pathophysiology is not clear. Further studies are needed to clarify the underlying pathophysiology and the response to the treatment.

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains.

[illegible]

Figure 1. The effect of the number of trials on the number of correct responses. The number of correct responses was significantly higher than the number of incorrect responses in all cases. The number of correct responses was significantly higher than the number of incorrect responses in all cases. The number of correct responses was significantly higher than the number of incorrect responses in all cases.
