Gentlemen:

Following is a notice of intention to do certain work as described below at the Stanolind Oil and Gas Company

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

The subject well has been drilled to a total depth of 5120' in Hard Lime and on recent swabbing tests well produced only 40 BO and 60 BW and drilling fluid in six hours. Well was subsequently shut in for 48 hours after which the tubing and casing pressures built up to 50 and 100#, respectively.

As well failed to kick off to flowing by use of swab, we propose to selectively acidize as follows: From 4671-4850 with 2,000 gallons and from 4850 to 5120 with 4,000 gallons acid using electric pilot to control top of oil acid interface.
