

## OIL CONSERVATION COMMISSION

SANTA FE, NEW MEXICO

## Miscellaneous Reports on Wells

RECEIVED  
MAR 14 1951

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below.

Place

OIL CONSERVATION COMMISSION,  
SANTA FE, NEW MEXICO.  
Gentlemen:

Following is a report on the work done and the results obtained under the heading noted above at the  
**Trebol Oil Company & E.G. Rodman** State **"B"** Well No. **4**  
Company or Operator Lease In the

**NK/4 SW/4** of Sec. **5**, T. **17-S**, R. **36E**, N. M. P. M.,  
**West Lovington** Field **Lee** County.

The dates of this work were as follows: **2-27-51 to 2-29-51**

Notice of intention to do the work was (was not) submitted on Form C-102 on **2-26** 19 **51**  
and approval of the proposed plan was (was not) obtained. (Cross out incorrect words.)

## DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

The above described well was treated with 750 gallons of Gel acid followed by 3000 gallons of 15% acid by Dowell, Inc. Pumping equipment was then installed with pump set at 5045'. Pumping test following the above work indicated a production of 35 barrels of oil per day, no water. As a result of the above work production was increased from 13 to 35 barrels per day, with the majority of this increase probably due to installation of pumping equipment.

Witnessed by **M. T. Johnson** **Trebol Oil Company & E.G. Rodman** **Engineer**  
Name Company Title
