

OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF	X	REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL

Place

April 23, 1945

Date

OIL CONSERVATION COMMISSION,
SANTA FE, NEW MEXICO.

Gentlemen:

Following is a report on the work done and the results obtained under the heading noted above at the
Stanolind Oil & Gas Co. State "R" Well No. 1 in the

Company or Operator
C SE/4 of SW/4 of Sec. 6, T. 17-S, R. 36-E, N. M. P. M.,
West Lovington Field, Lea County.

The dates of this work were as follows: April 11, 1945

Notice of intention to do the work was (was not) submitted on Form C-102 on April 10 19 45
and approval of the proposed plan was (was not) obtained. (Cross out incorrect words.)

DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

At 5:00 PM April 11, 1945, 40 hours had elapsed since setting 294' of 13" OD 50# Lapweld SH casing and cementing with 250 sacks to be used as surface string. Casing shut-off was tested as follows:

A pressure of 750# was built up and held for thirty minutes, as shut-off tested OK, cement plug was drilled and a pressure of 750# again built up and held for thirty minutes. As this test, too, was OK, drilling operations were resumed.

Witnessed by C. V. Campbell Stanolind Oil & Gas Co. Production Foreman

THEORY OF THE EARTH

CHAPTER I

OF THE ORIGIN AND DEVELOPMENT OF THE EARTH

THE EARTH, as we know it, is the result of a long and complex process of development, which has been going on since the beginning of time.

It is the result of the action of various forces, which have shaped the planet into the form we see today.

These forces are of two kinds: internal and external.

Internal forces are those which act from within the earth.

External forces are those which act from without the earth.

Internal forces are of two kinds:

1. Volcanic forces.

2. Gravitational forces.

External forces are of two kinds:

1. Atmospheric forces.

2. Solar forces.

Volcanic forces are those which

are caused by the action of

heat.

Gravitational forces are those which

are caused by the attraction of

the earth's mass.

Atmospheric forces are those which

are caused by the action of the

atmosphere.

Solar forces are those which

are caused by the action of the

sun.

The action of these forces has shaped the

earth into the form we see today.

It is the result of a long and complex

process of development, which has

been going on since the beginning of

time.

It is the result of the action of

various forces, which have shaped

the planet into the form we see

today.

These forces are of two kinds:

internal and external.

Internal forces are those which

act from within the earth.

External forces are those which

act from without the earth.

Internal forces are of two kinds:

1. Volcanic forces.

2. Gravitational forces.

External forces are of two kinds:
