Re: No Flare Notices

Dear Ms. McGuire:

We have received your request for an exception to Rule 306, for your State V Wells No. 1 located in Unit D, and No. 2 located in Unit C, both in Section 5, Township 17 South, Range 37 East.

Our research confirms that no casinghead gas is being produced from either of these wells, therefore you are granted an exemption from filing Form C-129.

If the situation changes and the wells begin producing casinghead gas, we request that you notify this office, connect the wells to a pipeline to sell the gas, or resume submitting your request to flare on Form C-129.

Very truly yours

OIL CONSERVATION DIVISION
