FULL DETAILS OF PROPOSED PLAN OF WORK
(FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

This well has been completed as a salt water disposal well by authority of The Oil Conservation Commission by its order No. R-861. The well was abandoned as a disposal well on 1-18-65.

It is planned to move in a drilling rig, clean out the hole to 11,400', drill out cement plug from 11,400' to 11,595' and ream 8 1/2" hole to 8 3/4" from 12,040' to the original T. D. of 12,316'. The well will then be deepened from 12,316' to 14,175' cutting a 8 3/4" hole to test the Ellenberger formation. If the Ellenberger is productive a string of 5 1/2" will be run as the long casing string.
