Waybelle Miller

December 21, 1962

Well No. 1 is located 193 ft. from [S] line and 435 ft. from [E] line of sec. 22

1/4 Sec. and Sec. No. 193 33 1934
(Field) (Twp.) (Range) (Meridian)
Tonto 193 New Mexico
(County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3634 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On December 21th, 1962 a one point surface pressure test on this well resulted in a calculated volume of 1, 732,879 MCF/day through a 1/2" orifice with a flowing surface pressure of 34.2 lbs. per sq. in.

The well is now shut in pending a market, and the approval of a cementation agreement covering the Southeast Quarter (SE/4) of Section 22, 160 acres, more or less, to be known as Shallow Tonto Gas Unit.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
