## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Plans are being made to drill this well approximately 75 feet deeper to test possible pay zones that showed oil staining and porosity in Pan-American's Laguna Plata No 1 deep test 200 feet west of same.

This confirms verbal conversation as of May 16, 1962 with Mr. Knauf.
