OIL CONSERVATION COMMISSION
SANTA FE, NEW MEXICO

910 Petroleum Life Building,
Midland, Texas
(Place)

3-21-65
(Date)

Gentlemen:

Following is a Notice of Intention to do certain work as described below at the Wilbanks and Rasmussen
(formerly opr'd by Coastal States & later by Jones Exploration Co.) Lease Well No. 1 in F (Unit)
(Company or Operator)
SE 1/4 NW 1/4 of Sec. 20, T. 17S, R. 36E, NMPM, Double "A" Abo (Upper) Pool
(40-acre Subdivision)
Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK (FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

Operator will kill well if necessary. Run 2-3/8" tubing and swab test well in the existing perforations from 9,007-27'. Permanent bridge plug which was set by former Operator, Jones Exploration Company, is set @ 9,100' and covers existing perforations 9,214-24'. It is suspected that an emulsion block was formed by the fracture treatment performed by the former Operator. If the well being shut-in for four (4) months has not allowed this block to break and cannot be swabbed in to flow, we plan to acidize with a 1,500 gallon acid treatment with emulsion removers. Further work will be requested should results be unsatisfactory.
