PACKER SETTING AFFIDAVIT

I, Philip M. Jones, being of lawful age and having full knowledge of the facts hereinbelow set out do state:

That I am the sole proprietor of Jones Exploration Company, that on June 13, 1967 I personally supervised the setting of a Halliburton R-3 packer in the Jones Exploration Company State No. 1 Located 2310 feet from the North line and 990 feet from the East line of Section 35-17S-35E, in the Vacum Abo (Reef) Field in Lea County, New Mexico, at a sub-surface depth of 8743 feet, setting depth measurement having been determined by tubing tally and confirmed by wire line measurement, that the purpose of setting this packer was to effect a seal in the annular space between the 5 1/2" 17# J-55 casing and 2" buttress tubing where the packer was set so as to prevent the comingling of the fluids produced from the Abo Reef formation below the packer and the salt water being injected down the annulus and into the perforations at 6955-95, above the packer; that this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the tubing and casing where it was set in such manner so that it prevented any movement of fluids across the packer; that I caused 70 barrels of salt water to be pumped into the annular space between the tubing and casing, and that this fluid was taken into the perforations from 6955-95 on a vacum, and that a pressure recorder on the tubing recorded no change in pressure before, during, nor after the period during which said fluid was being pumped.
