

NEW MEXICO OIL CONSERVATION COMMISSION
Santa Fe, New Mexico

(Form C-104)
Revised 7/1/57

REQUEST FOR (OIL) - (GAS) ALLOWABLE

This form shall be submitted by the operator before an initial allowable will be assigned to any completed Oil or Gas well. Form C-104 is to be submitted in QUADRUPLICATE to the same District Office to which Form C-101 was sent. The allowable will be assigned effective 7:00 A.M. on date of completion or recompletion, provided this form is filed during calendar month of completion or recompletion. The completion date shall be that date in the case of an oil well when new oil is delivered into the stock tanks. Gas must be reported on 15.025 psia at 60° Fahrenheit.

Introduction

The purpose of this study is to investigate the effects of various factors on the growth of a population of bacteria.

The study was conducted over a period of six weeks, during which time the growth of the bacteria was monitored under different conditions.

The results of the study are presented in the following sections, and a conclusion is drawn at the end.

The first section describes the methods used in the study, including the selection of the bacterial strain, the media used, and the experimental procedures.

The second section presents the results of the study, showing the growth curves for each of the different conditions.

The third section discusses the results in detail, comparing the growth rates and the final cell counts for each condition.

The fourth section discusses the implications of the results, and the factors that may have influenced the growth of the bacteria.

The fifth section discusses the limitations of the study, and the need for further research in this area.

The sixth section discusses the conclusions of the study.

The seventh section discusses the implications of the results, and the factors that may have influenced the growth of the bacteria.

The eighth section discusses the limitations of the study, and the need for further research in this area.

The ninth section discusses the conclusions of the study.

The tenth section discusses the implications of the results, and the factors that may have influenced the growth of the bacteria.

The eleventh section discusses the limitations of the study, and the need for further research in this area.

The twelfth section discusses the conclusions of the study.

The thirteenth section discusses the implications of the results, and the factors that may have influenced the growth of the bacteria.

The fourteenth section discusses the limitations of the study, and the need for further research in this area.
