Re: Final Approval
Ora Jackson et al No. 2
Located in Unit C, Section 5
Township 19 South, Range 35 East

Gentlemen:

Recently an inspection was made of the above captioned location, and it was found that the location had not been properly leveled and that a proper dry hole marker had not been installed.

The rules and regulations require that the location be returned to as near the original ground contour as possible. In this case, the material used for pit wall is left in a large mound on the well pad. Further, the Commission requires a four inch marker with the quarter quarter section, unit designation, section, township, and range numbers permanently stenciled or welded on the marker. In this case, a two inch marker with no description is being used.

Please notify this office when the above work has been done and another inspection will be made. If the location is found to be in accordance with the Commission Rules and Regulations, Form C-103 will be approved without further delay.

Very truly yours,

OIL CONSERVATION COMMISSION

Leslie A. Clements
Oil & Gas Inspector
