12. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

Marathon Oil Company proposes the removal of a CIBP within the Abo casing (2 7/8") to allow the downhole commingling of the Abo with the previously downhole commingled Wolfcamp and Upper Penn (DHC-260). The well will then be rod pumped up one 2 7/8" casing and vented up the other. The downhole configuration will reduce failures and increase the wells ultimate recovery.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
