Gentlemen:

The Warn State A/C 1 Well No. 3 was completed as a tubingless triple well in 1964. The Abo formation is presently producing through a 1 1/2" tubing string inside 2 7/8" casing. The Upper Penn and Wolfcamp formations were downhole commingled and produced through the Penn formation 2 7/8" casing string. This was due to the Wolfcamp string being lost when the 1 1/2" tubing string parted.

Yours truly,

A handwritten signature in cursive script that reads 'William D. Holmes'.

William D. Holmes  
Operations Superintendent
