

Mobil Exploration & Producing U.S. Inc.

May 23, 1995

Mr. Jerry Sexton
Oil Conservation Division
Supervisor, District I

Re: North Vacuum Abo Unit #112-D, Sec. 25, T17S, R34E

Dear Sir:

We are providing you with a written notice resulting from our telephone conversation on May 22, 1995, between yourself, Darrel Werley-Production Coach, Gary Hudson-Production Technician, and Larry McCrimmon-Maintenance Technician.

Due to the complication from the 1986 recompletion of this well, we have agreed with your recommendation to run a tracer down the tubing instead of the normal Mechanical Integrity Test. The tracer survey will be done on an annual basis starting at your request date.

With your permission, we have put NVA #112 back to injection as of May 22, 1995. Also at your request we have enclosed a chart that was ran prior to the May 1st. test date.

If you have any questions or need more information you can contact me at 391-6911 or 391-6904.

Thank you,

Larry McCrimmon
Maintenance Tech
