Re: Mattie Price SWD #6-G, Sec 6, T17S, R38E

Dear Mr. Stevenson:

We are receiving the C-120-A for the above referenced well in a satisfactory manner.

However, the information we have on the conversion of this well is not complete. We request that you submit Form C-103 showing the conversion procedure, packer and tubing setting depth, pressure test, and information on any repairs which may have been necessary to bring the well into satisfactory condition for disposal. This information was requested in a letter dated March 30, 1987.

The tracer survey which was witnessed by the field representative was satisfactory, but to date we have not received a copy of this survey. We request that you send a copy of this along with the C-103.

Very truly yours

OIL CONSERVATION DIVISION
