	<input type="checkbox"/> Change of Plans
	<input type="checkbox"/> New Construction
	<input type="checkbox"/> Non-Routine Fracturing
	<input type="checkbox"/> Water Shut-Off
	<input checked="" type="checkbox"/> Conversion to Injection
	<input type="checkbox"/> Dispose Water

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Propose to drill out CIBP at 4650' that covers Queen perms from 4730' to 4736'.
Set packer at 4800' and acidize squeezed Queen perms from 4996'-5006'.
Establish injection rate. Release packer and reset at 4630'. Establish
injection rate and run step-rate test to get injectivity profile. We propose
to use this well for pressure maintenance for our Gov't E-7 Queen well located
in the NENW of S.25, T19S, R34E. We would anticipate commencing work on
February 1, 1994.
