Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

The captioned well has been drilled to 360 feet with cable tools. We have been advised by the BLM in Santa Fe that the lease has expired and cannot be extended by drilling this well. We plan to appeal this decision but will comply with BLM order to cease drilling operations. The following temporary abandonment procedure will be used:

- \* 1. Fill hole completely with approximately seven yards of ready-mix cement.
- 2. Set iron P & A marker in top of well.
- 3. Move off rig
- 4. Level mud pit.

\* Hole Size = 10 3/4"

Ripping of road and pad will be postponed until decision is made on our appeal.

Note: The well encountered a four-foot fresh water sand at 280' with very limited capacity (2 gallons per minute) and capable of rising only to 240' from surface overnight. The well is bottomed in Red Bed.

18. I hereby certify that the foregoing is true and correct
