17. Describe Proposed or Completed Op	erations (Clearly state all pertinent details, and eive pertinent dates, including	estimated data of securi

work) SEE RULE 1103.

On November 2, 1983 a pulling unit was rigged up on the well and the rods, pump and tubing pulled out of the hole. A 2 7/8" work string was run in the well and a Rtts packer set at 8796'. The perforations from 8824' to 8924 were treated with 6000 gallons 20% HCl acid and 6000 gallons of Purgel 20 using 15 ball sealers for diverting material. The 2 7/8" work string was pulled out of the well and the 2 3/8" production string ran in the well. The pump and rods were installed and the pulling unit rigged down. Presently the well is pumping to the battery.
