

MULTI-POINT SURFACE USE  
AND OPERATIONS PLAN

WALLEN PRODUCTION COMPANY

WALLEN TONTO # WELL  
990' FEL and 1350' FSL, Sec. 30-19S-33E  
Lea County, New Mexico  
Lease ~~NP~~ 073240

This plan submitted with the "Application for Permit to Drill" the above described well. This plan describes the location, the proposed construction and operations plan, the necessary surface disturbance and the proposed rehabilitation after completion of activities.

1. EXISTING ROADS:

- A. Plat "A" is a portion of a USGS topographic map, Lea County, New Mexico, showing existing roads. The location is 21.5 miles west of Arkansas Junction on U.S. 62 & 180, turn right on New Mexico 176 for 4.7 miles, and turn right on New Mexico 31 for 6.2 miles, and turn right for 5.3 miles on an improved lease road, then turn right again for 1.5 miles, turn left for .7 miles and turn right for 1 mile to proposed drillsite.
- B. Plat "B" is a land plat with all existing roads in a one (1) mile radius from the proposed well-site and the planned access road.
- C. A portion of the existing, eroded, caliche road from the east section line of section 30 (where the BLM caliche quarry is located) will be repaired and **200'** of new road will be made. We use an 8" deep 12' wide watered and compacted method of road building and repair.

2. PLANNED ACCESS ROAD:

- A. Length and width: The new road will be **200'** long and 12' wide. This road is colored red on Plat "B". This road will be staked and flagged on the center line of the road. Each flag will be visible from the next.
- B. Surfacing Material: Eight (8) inches of compacted, watered and graded caliche will be used.
- C. Maximum Grade: Three (3) percent.
- D. Turnouts: Three passing turnouts every 2000' will be constructed. They are 20' by 30', including road.
