

8. ANCILLARY FACILITIES:

- A. None required.

9. WELLSITE LAYOUT:

- A. Plat "D" shows the relative location and dimensions of the well pad, disposal pit, rig, water tank and dead men.
- B. Only minor leveling and shinerly scraping will be required.
- C. The pad has been flagged.

10. PLANS FOR RESTORATION OF THE SURFACE:

- A. After completion of drilling and/or completion operation all equipment and other material not needed for operations will be removed. Pits will be filled and location cleaned of all trash and junk to leave the wellsite as attractive as possible.
- B. Any unguarded pits containing fluids will be fenced until they are filled.
- C. After abandonment of the well, any special rehabilitation or revegetation requirements of the surface management agency will be complied with and accomplished as soon as possible. All pits should be filled and leveled within 90 days after abandonment.

11. OTHER INFORMATION:

- A. Topography: Land surface is rolling and dune. From an elevation of 3589' at the wellsite, the surface slopes to the south at the rate of 50' per mile.
- B. Soil: The soil is fine sand and clay underlain by caliche.
- C. Flora and Fauna: Vegetation consists of mesquite, yucca, scrub oak and native grasses. Wildlife includes coyote, rabbits, rodents, reptile, dove, quail and antelope.
- D. Ponds and Streams: There are no rivers, streams, fresh water lakes or ponds in the area, however, there is a salt water disposal sink within 1½ miles southeast of the proposed location.
- E. Residences and Other Structures: The nearest occupied dwelling is a ranch house 2¼ miles southwest. The nearest water is there also.
- F. Archeological, Historical and Cultural Sites: There are none in the area.
