

10. Plans for Restoration of the Surface:

After completion of drilling and/or completion operations all equipment and other material not needed for operations will be removed. Pits will be filled and locaiton cleaned of all trash and junk to leave the wellsite in an aesthetically pleasing condition as possible.

Any unguarded pits containing fluids will be fenced until they are filled.

After abandonment of the well, any special rehabilitation and/or revegetation requirements of the surface management agency will be complied with and accomplished as expeditiously as possible. Weather permitting, all pits will be filled and levelled within 90 days after abandonment.

11. Other Information:

Topography: Land surface is rolling sand dune. As shown in Exhibit "A" the land slopes to the southwest at about 5' feet per mile.

Soil: Soil is sand approximately 4' deep over a caliche base.

Flora and Fauna: Vegetative cover is sparse and consists of mesquite, shin oak, sage and native grass. Wildlife consists of coyotes, rabbits, rodents, reptiles, dove, quail and crows.

Ponds and streams: There are no streams, lake or ponds in the area.

Residences and Other Structures: There are no residences within a radius of 3 miles. A windmill is 261' west of the location of pipelines, power lines, lease roads and tank batteries within a radius of one mile.

Archeological, Historical and Cultural Sites: None observed in the area.

Land Use: Grazing and hunting in season.

Surface Ownership: The well site is on Federal surface.

12. Operator's Representative:

The field representatives responsible for assuring compliance with the approved surface use and operations plan are as follows:

C. W. Trainer
9205 Highway 71 West
Austin, Texas 78746
Phone: 512-288-2613

Marvin C. Gross
P. O. Box 358
Roswell, New Mexico 88201
Phone: 505-623-3539
