Gentlemen:

The above referenced plugged well sites have recently been inspected by an Oil Conservation Division Representative, in an attempt to release the locations.

As a result of these inspections, the inspector found that the following work still needs to be done before they can be released.

Vacuum State Unit #1-J

1. The location needs to be cleared of the flowline, electrical conduit, and junk.

Midwest State Unit #1-B

1. There are anchors and trash on location that need to be removed.

When the above items have been done, please contact Jerry Sexton at 505-393-6161 or sign this letter below and return it to our address stated above.

Very truly yours,

JERRY SEXTON
District I Supervisor
