Re: South Double A Abo Pool Wells
Abo-D 7903 JV-P #1-F 30-17-36
Abo-D 7903 JV-P #2-L 30-17-36

Gentlemen:

As requested by an off-set operator, the Oil Conservation Division witnessed production tests on the above wells on April 23 and 24, 1986.

As a result of these tests, the allowables for these wells will be reduced effective May 1, 1986, as indicated by the attached supplement.

Abo-D 7903 JV-P #1-F in 30-17-36 -- 253 BPD
Abo-D 7903 JV-P #2-L in 30-17-36 -- 99 BPD

It is my understanding that you may plan to install pumping equipment and if this is the case another potential test may be taken. Also, if you disagree with our findings, you may request a retest.

Very truly yours,

OIL CONSERVATION DIVISION

Jerry Sexton
Supervisor, District I

Re: South Double A Abo Pool Wells

Gentlemen:

In response to an off-set operator's inquiry, we feel a production test is necessary on your Abo D 7903 JV-P #1 and #2 located in Section 30, T17S, R36E.

Please have someone with your firm contact Eddie Seay or myself by Monday, April 21, 1986, to set a time that we may witness a gas/oil ratio test on these wells.

Very truly yours,

OIL CONSERVATION DIVISION

Jerry Sexton
Supervisor, District I
