RE: Request Administrative approval for a dual
completion in the Howry "25" #1.

Dear Jerry:

The subject well was tested in the Wolfcamp and shown to be commercial, however, we are currently waiting for a gas connection. As our previous conversation indicated, we are requesting dual completion for the Bone Springs and Wolfcamp. The Bone Springs is temporarily abandoned since it is unable to flow on the backside and is isolated from the Wolfcamp with a Baker Lok Set Packer.

In Section 1e, of form C-107, actual production tests are submitted for each zone. In the event the Wolfcamp depletes to the point that it will not flow, we will request approval to pump both zones together as down hole commingle production.

If there is need for further information please let me know.

Sincerely yours,

A handwritten signature in cursive script, appearing to read "Ray F. Nokes".

Ray F. Nokes
