(Note: Report results of multiple completion on Well  
Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

The subject well is currently completed in the Bone Spring oil zone (perfs @ 9376-9454') and in the Morrow gas zone (perfs @ 13,186-13,526'), but only the Bone Spring is being produced.

Pennzoil proposes to isolate the Bone Spring between two packers in order to produce the Morrow formation. Please see the attached "Workover Prognosis" for details on the proposed operation.

Recognizing the need to isolate the Bone Spring zone, Pennzoil feels that a cement squeeze job would cause irreparable formation damage that would prevent return of the Bone Spring to economical production once the Morrow depletes.

I hereby certify that the foregoing is true and correct

SIGNED *Francis J. Reddy*
