Re: Surface Commingling
Forest Oil Corporation
B Lee-State #7 & #8
Sec. 5, T-19-S, R-35-E
Lea County, New Mexico

Forest Oil Corporation is currently completing the B Lee-State No. 8 in the above captioned location. We are planning on filing an application to Rule 303-A to permit the surface commingling of the B Lee-State No. 7 Scarb (Bone Spring) production and the B Lee-State No. 8 Wolfcamp production.

The B Lee-State No. 7 produces 19 BOPD and the preliminary tests indicate a rate of 60-100 BOPD from the B Lee-State No. 8. Gas and oil production from each well will be individually metered. If you need any further information while the application is in the approval process, please contact me at 915-688-1929.

Very truly yours,

FOREST OIL CORPORATION

Charles A. Barber
