IN REPLY REFER TO: 3162.4 (NM-080) Lease# No. NM-94191

> Harvey E. Yates P O Box 1933 Roswell, NM 88202

On September 18, 2001, we completed a field examination of the abandoned Shogrin 12 Federal No. 1 well located 1800 feet FNL and 2310 feet FWL in Section 12, T. 18 S., R. 32 E., Lea County, New Mexico.

The following actions must be completed prior to abandonment approval.

- The surface location is to be cleaned and leveled per BLM requirements.
- <u>Private Surface</u>: Reclamation is to be accomplished in accordance with operator/landowner agreement. Where no agreement exists, the BLM will be contacted to provide abandonment stipulations.
- The drill pad should be ripped to a minimum of 12" depth.
- The drill site (including reserve pit area) is to be reseeded according to the attached specifications for Seed Mixture No. 2.
- All ripped surfaces are to be protected from vehicular travel by constructing a dead-end ditch and earthen barricade at the entrance to these ripped areas. The barricade is to be constructed using spoil material from the ditch and should be of sufficient size to discourage vehicle entry.
- Meter Runs and Pipelines: Contact the utility company associated with the meter run or pipelines prior to any reclamation work. Meter runs will need to be removed before reclamation work is completed. Please contact the utility company to initiate removal.
- Special Stipulations: Remove two power poles. Cross rip pad.

When these requirements have been fulfilled, please contact Don Peterson, Surface Protection Specialisizat (505)234-5925. If you have any questions, please do not hesitate to call.

Sincerely feld Manager

EXHIBIT B

BLM Serial No.: Company Reference:

Seed Mixture 2, for Sandy Sites

The holder shall seed all disturbed areas with the seed mixture listed below. The seed mixture shall be planted in the amounts specified in pounds of pure live seed (PLS)* per acre. There shall be <u>no</u> primary or secondary noxious weeds in the seed mixture. Seed will be tested and the viability testing of seed will be done in accordance with State law(s) and within nine (9) months prior to purchase. Commercial seed will be either certified or registered seed. The seed container will be tagged in accordance with State law(s) and available for inspection by the authorized officer.

Seed will be planted using a drill equipped with a depth regulator to ensure proper depth of planting where drilling is possible. The seed mixture will be evenly and uniformly planted over the disturbed area (smaller/heavier seeds have a tendency to drop the bottom of the drill and are planted first). The holder shall take appropriate measures to ensure this does not occur. Where drilling is not possible, seed will be broadcast and the area shall be raked or chained to cover the seed. When broadcasting the seed, the pounds per acre are to be doubled. The seeding will be repeated until a satisfactory stand is established as determined by the authorized officer. Evaluation of growth will not be made before completion of at least one full growing season after seeding.

Species to be planted in pounds of pure live seed* per acre:

Species

Sand dropseed (Sporobolus cryptandrus) Sand lovegrass (Eragrostis trichodes) Plains bristlegrass (Setaria macrostachya)

lb/acre 10

*Pounds of pure live seed:

Pounds of seed **x** percent purity **x** percent germination = pounds pure live seed
