Re: Baker 7M #1-M Sec. 7, T17S, R38E

Gentlemen:

In order to complete our records on the above referenced plugged well, please submit one copy of each log which was run on this well, one copy of the deviation survey, well record (C-105), and a C-103, subsequent report showing the plugging procedure and date of plugging.

As soon as conditions permit and the pits are sufficiently dry, we request that you cut and level the pits and location, remove all materials and clean the area.

Ray Burnett has notified us of his intention to install an irrigation pivot, therefore it is necessary that the dry hole marker be placed low enough so there is clearance for the pivot to operate without interference from the pipe.

We request that you check other locations which you have drilled in the surrounding area and take any steps necessary to bring them into a satisfactory condition.

Very truly yours

OIL CONSERVATION DIVISION
