

MULTI-POINT SURFACE USE AND OPERATIONS PLAN
SANTA FE ENERGY OPERATING PARTNER, L.P.
Corrienta 12 Federal No. 1
1980' FSL & 2310' FWL
Section 12, T18S, R32E
Lea County, New Mexico

This plan is submitted with Form 3160-3, Application for Permit to Drill, covering the above described well. The purpose of this plan is to describe the location of the proposed well, the proposed construction activities and operations plan, the magnitude of necessary surface disturbance involved, and the procedures to be followed by rehabilitating the surface after completion of the operations, so that a complete appraisal can be made of the environmental effects associated with the operation.

1. EXISTING ROADS.

- A. Exhibit E is a topographic map of a scale of approximately one inch to two miles which shows location of the proposed wellsite and roads in the vicinity. The proposed location is situated approximately 25 miles east of Carlsbad, New Mexico.

DIRECTIONS:

1. Proceed west on Highway 62-180 from Hobbs, New Mexico for 12 miles.
2. Turn right (north) onto Highway 529, Arkansas Junction, and continue for 21 miles west.
3. Turn left at mile marker 11. Go 2.5 miles southwest. At sharp corner go south 1.5 miles to location.

2. PLANNED ACCESS ROAD.

A new road will be constructed from an existing road in the E/2 of Section 12.

3. LOCATION OF EXISTING WELLS.

- A. The well locations in the vicinity of the proposed well are shown in Exhibit F.

4. LOCATION OF EXISTING AND/OR PROPOSED FACILITIES.

- A. There is no producing well on this lease at this time.
- B. In the event the well is productive, the necessary production equipment will be installed on the drilling pad. If the well is productive of oil, a gas or diesel self-contained unit will be used to provide the necessary power. No power will be required if the well is productive of gas.
