

9. WELLSITE LAYOUT.

- A. Exhibit G shows the dimensions of the well pad and reserve pits, and the location of major rig components.
- B. The ground surface of the location is flat and will be cleared of grasses & weeds. Pad will be covered with at least six inches of compacted caliche.
- C. The reserve pits will be plastic lined.
- D. A 400' x 400' work area which will contain the pad and pit area has been staked and flagged.

10. PLAN FOR RESTORATION OF THE SURFACE.

- A. After finishing drilling and/or completion operations, all equipment and other material not needed for further operations will be removed. The location will be cleared of all trash and junk, to leave the wellsite in as aesthetically pleasing a condition as possible.
- B. Unguarded pits, if any, containing fluids will be fenced until they have been filled.

11. TOPOGRAPHY.

- A. The vegetation cover at the wellsite is moderately sparse, with prairie grasses, some yucca, and miscellaneous weeds.
- B. No wildlife was observed but it is likely that rabbits, lizards, insects, and rodents traverse the area.
- C. There are no ponds, lakes, streams, or rivers within one mile of the wellsite.
- D. The wellsite is located on federal surface.
- E. There is no evidence of any archaeological, historical, or cultural sites in the vicinity of the location.
