FROM: Herb Thackeray

Nelda - Here are the C-116 forms you requested for our new wells. The originals are in the mail. We will be testing the Inca Fed #13 next week and in all probability ~~potentially~~ needing a full depth instead of marginal allowable.

If Chris will be available the following week I would like to meet with him concerning protection of our correlative rights. (I'll be in the area March 14-16). The NMCD webpage production data show the Xion #2 well has overproduced it's allowable by 24,277 BO from 6/99 thru 11/2000. That is 303.5 days of overproduction and we feel they should be shut in. Curtailment will continue to deplete the reservoir unfairly to our detriment.
