22 Describe the proposed program. If this application is to DEEPEN or PLUG BACK give the data on the present productive zone and proposed new productive zone. Describe the blowout prevention program, if any. Use additional sheets if necessary

Marathon Oil Co request permission to recomplete this well to the Abo & Upper Penn as per the attached prognosis. Approval to DOWNHOLE COMMINGLING is also requested. Downhole commingling will not result in crossflow due to the use of rod pumping equipment. It will avoid waste and prolong the economic life of the well. It will allow the production of historically low volume zones whice by themselves may not justify continued operation of the well.

Approval for workover only -- CANNOT produce until Downhole Commingl is approved.

23 I hereby certify that the information given above is true and complete to the best of my knowledge and belief.
