Re: Test Allowable for April 1997
New Mexico O State NCT-1 #39
Unit Letter G, Sec. 36, T-17-S , R-34-E
API 30-025-33569; Vacuum Upper Penn

Mr. Sexton:

Attached is a C-104 requesting a test allowable for April, 1997 on the above well. A test allowable had previously been approved for March, 1997. The well pumped approximately fifteen days in March and twenty days in April. The well experienced several downhole failures during both months and was also shut in on two different occasions for downhole surveys. Due to this downtime, a dependable final test of production has not be achieved.

Texaco Exploration and Production Inc. plans to finalize the production test on this well within the next five days. If you have any questions concerning this request, please me @ 397-0418. Thank you for your assistance in this matter.

Yours very truly,

Monte C. Duncan
Engineer's Assistant
