RE: Correcting API Number

Gentlemen:

Per telephone conversation with Theresa McAndrews and Donna Pitzer of the District I Hobbs office on the Mallon 34 Federal #15-M, Sec. 34, T-19s, R-34e with API #30-025-32817. This well was first permitted to drill at 990/S & 990/W, and on May 1996 was drilled 25' and then plugged and abandoned.

The well was moved to 330/S & 330/W and drilled June 1996. The ONGARD system cannot accept this kind of move so at this time a new API #30-025-33589 was assigned. Along with the new API, the well number was changed to #17.<sup>15</sup>

This letter is to correct all forms filed since the well was drilled at the 330/S & 330/W and will be know as the Mallon 34 Federal #15-M. Also to notify the operator of the new number so that production can be reported correctly on the C-15<sup>15</sup> and to the BLM.

If you have any questions on this matter, please call the District I, Hobbs office (505) 393-6161.

Yours very truly,

OIL CONSERVATION DIVISION
