

SURFACE USE AND OPERATING PLAN

Attachment to Form 3160-3
Devon Energy Corporation (Nevada)
Mescalero Ridge 35 Unit #23
1300' FNL & 1300' FEL
Section A-35-T19S-R34E
Lea County, New Mexico

1. Existing Roads

- A. The well site and elevation plat for the proposed Mescalero Ridge 35 Unit #23 are reflected on Exhibit #2. This well was staked by General Surveys of Lovington, New Mexico.
- B. All roads into the location are depicted in Exhibit #3. Hwy 62/180 and the existing lease road will be used to access the location. Approximately 600' of new road will be constructed to access the location.
- C. Directions to location: From Hobbs take Highway 62/180 and go west approximately 26 miles. Turn south through cattle guard onto lease road and go 0.4 mile. Turn east and go 0.2 mile, turn south and go .1 mile into location.

2. Proposed Access Road

Exhibit #3 shows the 400' ($\pm$) of new access road to be constructed from the existing lease road. It will be constructed as follows:

- A. The maximum width of the road will be fifteen (15) feet.
- B. It will be crowned and made of 6 inches of rolled and compacted caliche. Water will be deflected, as necessary, to avoid accumulation and prevent surface erosion.
- C. Surface material will be native caliche. This material will be obtained from a BLM approved pit nearest in proximity to the location.
