

Matador Operating Company

Pipeline A Federal 8 #2

Sec. 8 T19S R34E

API #30-025-35632

Lea County, New Mexico

Date : 7/9/2002

Activity: Swabbing

Remarks : Tubing open to tank, no fluid. SICP 340 psi. Continued swab. FL first run at 9000'. Made 3 swab runs. Recovered 7 BW with skim of condensate in samples. SICP 380 psi. Well flowed 3 hours, rates starting at 360 mcf/d decreasing to 40 mcf/d. RD Key service unit. RU Aries swab unit. Continue swab/flow. Recovered total of 18 BW. Final SICP 150#. Release PPS over night. SDON.

Date : 7/10/2002

Activity: Swabbing

Remarks : Tubing open to tank, no fluid. SICP 340 psi. Tubing was shut in by mistake 12 hours, 170 psi. Continued swab. FL first run at 11600'. Made 3 swab runs. Recovered 17 BW with skim of condensate in samples. SICP 300 psi. Well flowed 5 hours, rates starting at 360 mcf/d decreasing to 40 mcf/d. Made 2 swab runs. Well flowed. Leave open to frac tank. SICP 140 psi. Total recovered: 21 BW. SDON.

Date : 7/11/2002

Activity: Producing

Remarks : Tubing open to tank, no fluid. SICP 370 psi. Continued swab. FL first run at 10800'. Made 2 swab runs. Recovered 12 BW with skim of condensate in samples. SICP 380 psi. Well flowed 3 hours, rates starting at 340 mcf/d, decreasing to 40. Made 2 swab runs after 2 hours flow. Drop soap between runs. Total fluid this report 22 bbls. Leave open to tank. SDON.

Date : 7/12/2002

Activity: Swabbing

Remarks : Tubing open to tank, no fluid. SICP 340 psi. Continued swab. FL first run at 10000'. Made 3 swab runs. Recovered 12 BW with skim of condensate in samples. SICP 360 psi. Well flowed 3 hours, rates starting at 300 mcf/d, decreasing to 40 mcf/d. Made 2 swab runs after 2 hours flow. Recovered total of 16 BW. SICP 140 psi. Leave open to tank. SDON.

Date : 7/13/2002

Activity: Swabbing

Remarks : Tubing open to tank, no fluid. SICP 360 psi. Continued swab. FL first run at 9800'. Made 2 swab runs. Recovered 12 BW with skim of condensate in samples. SICP 380 psi. Well flowed 3 hours, rates starting at 300 mcf/d, decreasing to 40 mcf/d. Made 2 swab runs, recovered 3 bbls. SICP 220 psi. Leave open to tank.

Date : 7/14/2002

Activity: SDFWE

Date : 7/15/2002

Activity: Swabbing

Remarks : Tubing open to tank, no fluid. 36 hour SICP 720 psi. Continued swab. FL first run at 9000'. Made 3 swab runs. Recovered 21 BW with skim of condensate in samples. Well flowed 3 hours, rates starting at 500 mcf/d, decreasing to 40 mcf/d. Made 2 swab runs, recovered 9 bbl. SICP 170 psi. Total recovered 30 BW. Leave open to tank. SDON.

Date : 7/16/2002

Activity: Swabbing

Remarks : Tubing open to tank, no fluid. 18 hour SICP 500 psi. Continued swab. FL first run at 10800'. Made 4 swab runs. Recovered 16 BW with skim of condensate in samples. Made 2 swab runs, recovered 5 bw. Leave open to tank. SDON. Total recovery 21 BW.

Date : 7/17/2002

Activity: Swabbing

Remarks : Tubing open to tank, no fluid. 16 hour SICP 390 psi. Continued swab. FL first run at 11000'. Made 3 swab runs.
