DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to run approximately 3518' of 14#, 5 1/2" casing to total depth of hole and mud with heavy mud. Halliburton will be employed to circulate mud behind casing.

Mud will be bailed from hole, after casing is set, and test made for shut-off.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
