Well No. 1 is located 800 ft. from $\begin{matrix} N \\ S \end{matrix}$ line and 330 ft. from $\begin{matrix} E \\ W \end{matrix}$ line of sec. 3NW $\frac{1}{4}$ NW $\frac{1}{4}$ Section 3
($\frac{1}{4}$ Sec. and Sec. No.)T-20-S, R-31-E
(Twp.) (Range)N.M.P.M.
(Meridian)Wildcat
(Field)
(San Miguel Area)Lea
(County or Subdivision)New Mexico
(State or Territory)

The elevation of the derrick floor above sea level is 3652.5 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Plan to drill with cable tool to test Yates 7-Rivers pay expected to be encountered at approximately 3700'. Will run 200' of 13 3/8" casing and cement with 45 sacks (or enough to circulate to surface); set 700' of 10" and set approximately 1400' of 8 5/8" casing. If production is encountered I propose to run 5 1/2" casing to the top of the pay and cement with 45 sacks (expected fill-up of 300'); run temperature survey to determine cement level and then perforate at this level and squeeze thru these perms. 800 sacks of cement (or enough to circulate to the surface). The 10" and 8 5/8" casing will be pulled.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
