SUBSEQUENT REPORT OF:

WATER SHUT-OFF	<input type="checkbox"/>	REPAIRING WELL	<input type="checkbox"/>
FRACTURE TREATMENT	<input type="checkbox"/>	ALTERING CASING	<input type="checkbox"/>
SHOOTING OR ACIDIZING	<input type="checkbox"/>	ABANDONMENT*	<input type="checkbox"/>

(Other) casing integrity test
(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

As per the BLM's request, dated March 25, 1992, a casing integrity test will be performed on this well prior to May 31, 1992. The casing will be loaded with salt/gel water and pressure tested to 500 psi. for 15 min.

The BLM office in Hobbs will be notified 24 hrs. prior to testing the well.

The reasons that Hudson and Hudson wish to keep this well in T&A status is because of the activity in Sec. 3,4,9,&10, T20S, R34E. Several wells have been completed in the Delaware formation. The Matlock well is strategically located and could be converted to a water disposal well or deepened and tested in the Delaware formation. A new location was recently staked in the NE/NE Sec.9, T20S, R31E.

18. I hereby certify that the foregoing is true and correct
