(State or Territory)

The elevation of the derrick floor above sea level is **3612** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I plan to drill a 3700' Yates-Seven Rivers test, using combination tools.

I propose to cement 8 5/8" casing in the top of the Anhydrite, at approximately 1450'.

I will drill ahead from this point with cable tools. A 3 1/2" production string will be cemented at approximately 3600'.

All casing will be run and cemented according to methods outlined under O.C.G. Rule III-A.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
