Wink, Texas August 3, 19 37J.S. Lea
Well No. 2 is located 1980 ft. from N line and 660 ft. from E line of sec. 15SE¹ of NE¹ of Sec. 15 20 S. 34 E. N.M.P.M.
(¹/₄ Sec. and Sec. No.) (Twp.) (Range) (Meridian)North Lea Lea New Mexico
(Field) (County or Subdivision) (State or Territory)The elevation of the derrick floor above sea level is 3655 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Total depth 3703' sand and lime. At this depth a bailing test showed 3 gallons of oil per hour and 24 bbls. sulphur water per day.

Desire to plug back with rock and steel cuttings from 3703' to 3693' and with lead wool from 3693' to 3690' to plug off the sulphur water in an attempt to make a small producer of this well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
