13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Also attached is a facility diagram for the Burk Royalty Co. operated Hanson "B" and Hanson "C" Leases in Lea County. The leases produce from the Yates Sand in the Lynch Field. The Hanson "B" produces 20 barrels of water per day and the Hanson "C" does not make any water. Attached is a current analysis of that produced water. Water is stored on the Hanson "B" in a 210 barrel steel tank. Water is stored on the Hanson "C" in an open top fiberglass tank that is netted. Water is moved from the leases by means of truck to a disposal well. Burk Royalty Co. does not own the disposal well and contracts with different companies to haul the water.
